

Fixing your greenhouse to a wall

Page 12 of the assembly instructions details how to mount your greenhouse onto a wall.

You will need to block the gutter at either end using part 86 if you

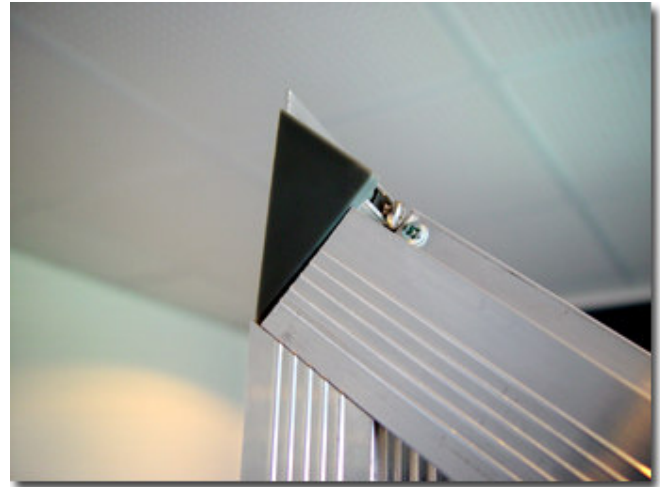

The plug is a part of fitting no. 86.

don't want the water out.

Downpipes are available as an optional extra on the Mini greenhouse.

Mount part 84 on either side of the ridge bar.

Looking good.

We recommend that you attach your greenhouse with two screws in each wall post and two screws in the ridge bar.

We have not made any hole in the wall post, and we don't know if the greenhouse is mounted in a brick wall or wooden wall. Therefore you have to make the holes yourselves.

We recommend to fasten the greenhouse with two screws in each wall post and two screws in the ridge bar.
